Giving feedback shouldn't mean choosing between honesty and kindness. Radical Candor offers a third way: a proven philosophy built on caring personally while challenging directly.

In this masterclass, Stephanie Sage draws on her work at Radical Candor to help leaders bring their full humanity to difficult conversations - showing how to challenge without creating enemies, show care without letting empathy take over, and deliver tough messages that people can actually hear and act on.

This session is designed for leaders who want to build stronger, more trust-based team relationships without sidestepping the hard conversations that drive real performance.

DECISION MAKING DRIVERS

WITH NIR EYAL

OVERVIEW

Hidden assumptions don't just shape perception, they determine the quality of every decision leaders make. In this session, Nir Eyal introduces the Three Powers of Belief: Attention, Anticipation, and Agency, and shows how each one influences what individuals notice, how they interpret risk and uncertainty, and how confident they feel in taking action.

Drawing on behavioural science and real-world examples, Eyal unpacks how flawed or unexamined beliefs lead to poor, reactive or overly cautious decisions, particularly when the pressure is on.

Leaders will gain a practical lens for identifying and reframing these beliefs, making the shift from automatic responses to more intentional, clear-headed decision-making in complex environments.

OVERVIEW

Leadership rarely comes with simple choices. Leaders are expected to deliver results while supporting their people, embrace change while maintaining stability, and set high expectations while showing empathy.

Building on Tim Arnold's work on AND thinking and the principles in Lead with AND and The Power of Healthy Tension, this session explores how to recognise when two seemingly opposing needs both matter, challenge the assumptions that keep them apart and find productive ways to hold them together.

Through reflection and discussion, participants will apply this thinking to the tensions in their own leadership, strengthening their ability to communicate across differences and use tension as a source of better judgement.

"As leaders, we're often wired to find solutions. But here's the truth: some tensions in leadership aren't meant to be solved. They're ongoing challenges we must learn to manage." / Tim Arnold
